

### **WSJT Robots**

Admin,

It has come to our attention that some operators have been using 'robot' software to gain advantage in our Marathon contests. Although the current rules do not specifically prohibit this operating method, the UKSMG Committee would like to state very clearly that such activity is contrary to the spirit of the contest and is fundamentally unfair to the other participants. The rules for future events will be amended to prohibit robot operation, but in the meantime, we would ask that any operator using a robot should reconsider their participation in the Summer Marathon.
